

Software from TheFormTool is *the most user-friendly and powerful document assembly and automation software in the world*

Our software transforms your ordinary Word documents into intelligent forms for repetitive use. Professionals and staff can assemble beautiful, accurate and completely personalized documents an average of 70% faster than manually while completely eliminating errors. We have a program for every office and every budget.

 **TheFormTool PRO** our basic program includes more than 100 features and functions

TEXT

Syntax agreement: gender control, noun/pronoun, singular/plural, subject/verb

Complete format control: capitalization, bold, italic, justification, color, etc.

Twenty-five date formats; unlimited custom formats; fixed or variable date offsets in business or calendar days, weeks, months or years

Lists nested within lists; sublists; filters; relational, linked, master and shared lists in narrative, stacked, table or custom formats

Unlimited custom role definitions

Save and share data for later use

CONDITIONS

Dynamic conditions automatically include/exclude words, phrases, sentences, paragraphs, or entire sections

Conditions may be linked to, chained with, compared with, computed on and logically dependent upon other text or math using binary, compound or Boolean logic

MATH

Twenty-six automated math functions: Absolute, Age, Constant, Days, Field, FirstDate, Integer, LastDate, ListCount, ListFirstDate, ListItem#, ListLastDate, ListMax, ListMin, ListMultiply, ListSum, Logarithm, Maximum, Minimum, Months, Now, Payment, RaisetoPower, Remainder, Root, Round, Years

Twenty-eight predefined math formats, unlimited custom formats

Price: \$89 per machine for lifetime license

 **Doxsera**[®] includes all of the above and adds:

The ability to create multiple simultaneous documents from the same data

The ability for a form to automatically incorporate external text or graphics into a document

Price: \$149 per machine per year

 **Doxsera**[®] **DB** includes all of the above and adds:

The ability for forms to pull data from SQL, Access, Excel and Outlook databases for information to either include in documents or to drive decisions on content

Price: \$279 per machine per year. DB User only price: \$179 per machine per year

AURORA webData[™] includes all of the above and adds:

Remote input through web browsers. Additional Users will want Doxsera DB or DB User for data access

\$795 per office

TheFormTool's learning curve is measured in minutes, not months; typical authors and users are productive within one hour. Saved documents are MS WORD docm or docx files are fully compatible with all WORD commands, protocols and programs. Documents, forms and data can be shared across networks. TheFormTool supports WORD for Windows 2007[™] and all later versions. No special knowledge or consultants are required. Online, offline, text and video training channels available 24/7.

Feature	TheFormTool (Free)	TheFormTool PRO	Doxserá	Doxserá DB
Access databases such as remote or local SQL, Access, Excel and Outlook, which documents can browse, analyze, and from which they can retrieve, include, and act upon stored data.				✓
Access, intelligently select, and insert external text and graphics to automatically create documents to fit circumstances.			✓	✓
Create multiple documents simultaneously			✓	✓
Additional network and security tools			✓	✓
Wrapper enables documents to automatically and intelligently change fonts, styles, graphics, borders, logos, headers and footers, watermarks, and margins.		✓	✓	✓
Conditions allow full Boolean and binary logic. Create completely dynamic forms, with appropriate words, phrases, sentences, paragraphs and entire pages automatically selected depending on the user's response to simple questions.		✓	✓	✓
Math includes 26 functions including Add, Subtract, Multiply and Divide; Absolute, Age, Constant, Days, Field, Integer, List (Count, Number, Maximum, Minimum, Multiply & Sum), Logarithm, Maximum, Minimum, Months, Now, Payment, Raise to Power (Exponentiation), Remainder, Root and Years. Each can be nested almost without limit to perform complex calculations.		✓	✓	✓
Metadata scrubber		✓	✓	✓
Syntax agreement: gender control, noun/pronoun, singular/plural, subject/verb		✓	✓	✓
Lists nested within lists; sublists; filters; relational, linked, master and shared lists in narrative, stacked, table or custom formats		✓	✓	✓
Attention Markers flag areas of a form for special attention.		✓	✓	✓
Master Lists store frequently-used information in one place for use in multiple forms. Great for signature blocks!		✓	✓	✓
GRID Answers to enter related data quickly and accurately.		✓	✓	✓
Network Support means saved information, answer files, master lists and saved Q&A Tables can be shared with other users.		✓	✓	✓
Save/Load allows you to save questions and answers used in one document for use in another document in the same matter, case, patient, or deal. Great for complex matters, patient intake, and client workups!		✓	✓	✓
Format text, numbers, dates anyway you like	✓	✓	✓	✓
Using Microsoft Word commands mean a learning curve measured in minutes, not months.	✓	✓	✓	✓
