

## **THEFORMTOOL, LLC INTRODUCES DOXSERÁ 2.0**

*The easiest to use document automation software in the world grows even more powerful*

**SEATTLE, WA — May 28, 2014** — TheFormTool, LLC announced today that Doxserá, already the easiest to use and most powerful document automation software in the world, dramatically expands the information productivity envelope with its upgrade to Doxserá 2.0.

Widely anticipated new features introduced in Doxserá 2.0 include functions that enable documents to create themselves by intelligently selecting external text or graphics for assembly into completely customized final documents. Already able to create multiple related documents simultaneously, Doxserá's new functions allow it to organically "grow" documents to precisely fit nearly unlimited numbers and complexities of circumstances.

Steven Sciple, a lawyer in Mobile, Alabama and a member of the customer test team for Doxserá 2.0, commented, "My clients expect and deserve the very best service, delivered efficiently. As a sole practitioner, TheFormTool has been a terrific tool, but after using Doxserá 2.0 for several weeks I think this changes everything.

"Doxserá's newest features allow me to easily, accurately and very quickly create completely personalized documents for my probate clients, no matter how complex or simple," he added. "That allows me to spend more time understanding my clients' needs.

"They'll appreciate Doxserá 2.0's benefits almost as much as I do!"

Doxserá 2.0 continues to enjoy earlier versions' revolutionary ease-of-use advantage, as customers can typically begin using the software in ten minutes or less, while avoiding any need for expensive professional installers or IT consultants.

According to Bob Christensen, CEO of TheFormTool, LLC, "Customers report saving more than 70% of the time previously needed to create wills, leases, product catalogs, real estate documents, medical forms, requests for proposals, and other repetitive documents. In addition, Doxserá essentially eliminates errors."

### **About TheFormTool, LLC**

TheFormTool, LLC is an innovative provider of user-friendly software for creating intelligent documents easily and accurately. Its products are in use by thousands of firms in dozens of countries. The company offers the award-winning TheFormTool PRO

for document assembly and its newest software, Doxserá, for complex multi-document automation. Doxserá is priced at just \$89 per year and offers the lowest life-cycle cost in its field. [www.theformtool.com](http://www.theformtool.com).
